### DIRECTORS' REPORT

The Directors present their report together with the financial report of the consolidated entity consisting of Greenerth Energy Ltd and the entities it controlled, for the financial year ended 30 June 2014 and auditor's report thereon. This financial report has been prepared in accordance with Australian Accounting Standards.

#### Directors

The names, qualifications, experience and special responsibilities of each person who has been a director of Greenerth Energy Ltd at any time during or since the end of the financial year are provided below, together with details of the company secretary as at the year end. The directors have been in office since the start of the year to the date of this report unless otherwise stated.

#### **Robert J. Annells** CPA, F.Fin. (*Chairman*)

Mr Annells was appointed Chairman on 1 July 2010. He has held a seat on the board as a non executive director since the company's inception on 13 July 2006. He is a former member of the Australian Stock Exchange with over forty years' experience in the securities industry, and is also a qualified accountant. His experience includes provision of corporate and investment advice to the business and resources industries.

Mr Annells is currently the Chairman of Greenerth Energy Limited (ASX:GER) and Lakes Oil N.L.(ASX:LKO) (where he has served on the board since 1984). He is a non-executive director of Rum Jungle Resources Limited (ASX:RUM) (appointed in 2006 and serving as Chairman from 2012 to June 2014). He was also Chairman of Central Australian Phosphate Limited (ASX:CEN) from July 2013 until its delisting in January 2014 following compulsory acquisition by RUM. During the past three years Mr. Annells has not held any other listed company directorships.

Mr Annells is also a member of the Audit Committee of Greenerth Energy.

#### **John T. Kopcheff** B.Sc (Hons) (Geology and Geophysics), SPE, AIMM (*Non Executive Director*)

Mr Kopcheff was appointed to the Board on the 13 July 2006. He is a geologist and geophysicist, and holds a Bachelor of Science (Honours) from the University of Adelaide (1970). He has extensive petroleum experience in Australia, South East Asia, USA, South America and the North Sea, both in field operations and management.

Mr Kopcheff held the position of Managing Director of Victoria Petroleum Ltd from August 1984 until late July 2010 and continued on their board as Executive Director until resigning on 22 September 2010. He was also a non executive director of Great Panther Silver Limited from August 2001 through to 30 June 2012 when he resigned from the position. Mr Kopcheff is the Chairman of the Audit Committee.

## GREENEARTH ENERGY LTD AND CONTROLLED ENTITIES

ACN: 120 710 625

### DIRECTORS' REPORT

#### Directors (continued)

##### **Samuel R. Marks CA, B.Bus. (*Managing Director*)**

Mr Marks was appointed as Managing Director on 1 July 2012. Mr Marks has over 16 years global commercial experience across accounting, consulting, corporate finance and corporate roles. He commenced his career with Coopers & Lybrand (PwC) in the Middle Market team, followed by Arthur Anderson (now KordaMentha) in their advisory/insolvency team.

Prior to founding the Toroso Group (subsequently Main Street Capital) in 2009, Mr Marks completed 7 years within General Electric based in Australia and the United States and was responsible for leading and executing projects across the US, UK, Europe, Australia, China and Hong Kong.

Mr Marks is a Chartered Accountant with a Bachelor of Business and is Six Sigma qualified through General Electric. He is also a director of The Melbourne Foundation, a not-for-profit organisation which provides education opportunities for financially disadvantaged youths. Mr Marks has not held any other directorships of listed companies during the three year period prior to 30 June 2014.

##### **Philip Zajac B.Comm, F.Fin (*Non Executive Director*)**

Mr Zajac was appointed to the Board on 4 September 2014, and has over 30 years of commercial experience in the finance industry. He is currently the CFO and an executive director of the Erdi Group of companies, a director of Erdi Fuels Pty Ltd, and a non-executive director of NewCO2Fuels Ltd (Israel).

Mr Zajac is involved in the development, ownership and management of eight hotels in Victoria, Sydney and Brisbane, along with the design and construction of affordable student housing and apartments. He also runs an extensive philanthropy programme across Australia and overseas. No other directorships of listed companies were held at any time during the three years prior to 30 June 2014.

#### Company Secretary

##### **Robert Smith, B.Bus(Acc), CA (*Company Secretary since 2 July 2013 and as at the date of this report*)**

Mr. Smith is also the Chief Financial Officer of Greenerth Energy Ltd, and has previously held senior financial roles both within industry and within public practice.

#### Principal activities

The principal activities of the consolidated entity during the financial year were geothermal exploration and investment in energy efficiency technologies along with other renewable energy research and development projects. There has been no significant change in the nature of these activities during the financial year.

#### Results

The consolidated loss after income tax attributable to the members of Greenerth Energy Ltd was \$226,112 (2013: \$1,612,998 loss).

## GREENEARTH ENERGY LTD AND CONTROLLED ENTITIES

ACN: 120 710 625

### DIRECTORS' REPORT

#### Review of operations

A review of the operations of the consolidated entity during the financial year and the results of those operations are as follows:

The 2014 year was one of consolidation and stabilisation of the Greenearth Energy Group ("the Group"). After an initial 12 months of restructuring in 2012/13, the executive team of the Group focused on developing a strong platform for long term growth in 2013/14, with a focus on core businesses. This resulted in a position at the end of the financial year where the Group concentrated on building underlying income via the Industrial Energy Efficiency business, Greenearth Energy Efficiency ('GEE'), and acquiring a 33.33% stake in NewCO2Fuels Ltd ('NCF'), which is managed by an external leadership team in Rehovot, Israel. The historical main-stay of Greenearth Energy, our Geothermal division, has seen our Australian work program requirements suspended until further notice due to the Victorian State Government ban on drilling and Hydraulic Fracturing, as outlined in more detail in the report.

In establishing this platform for growth, the team completed an initial capital raise in October 2013 of \$0.7m, followed by a larger raise in May / June 2014 of \$3.84m, including a Share Purchase Plan. These raises have helped consolidate this refocus and provided the Group the opportunity to hire key new staff within GEE, focusing on sales and other areas of growth required within the business. Additionally, GER completed its first instalment of a payment to NCF towards the \$US3m required to complete the transaction to acquire 33.33%.

The key to the long term success of the Group is to build on these now established platforms in 2014/15. These two main focuses are developing increased sales within GEE and assisting the NCF business move successfully from an R&D business, into a commercialisation venture.

#### *Financial overview*

The Consolidated Loss of the Group after Tax decreased by 86% from the previous comparative period to \$226,112 (2013: \$1,612,998) principally due to the following key drivers:

- Revenue and other income included a \$2,161,151 gain recognised on changes to the Group's investment in NewCO2Fuels Ltd. This resulted from the disposal of the Group's previous 50% ownership interest in NewCO2Fuels Ltd under the previously negotiated option arrangements with Erdi Fuels, consideration for which had been received progressively over a three year period ending in June 2014 (as documented in prior annual reports). In conjunction with the disposal of this previous 50% interest, the Group entered into a new agreement to acquire a 33.33% interest in NewCO2Fuels Ltd. These transactions are discussed in further detail below as well as note 15 to the financial statements.
- Revenue from sale of goods increased by 58% from the previous comparative period to \$661,297 (2013: \$419,320). This was predominantly driven by the renewed focus on the Industrial Energy Efficiency business, with 2013/14 establishing more "proof of concept" sites and pilots utilising our Lighting technologies.
- Expenses increased by 19% from the previous comparative period to \$2,949,074 (2013: \$2,481,215). Following the previous year's focus on cost reductions, the Group commenced a number of business initiatives, principally around investing in GEE's growth post the October capital raise, details of which are outlined in the following section of this report.

## GREENEARTH ENERGY LTD AND CONTROLLED ENTITIES

ACN: 120 710 625

### DIRECTORS' REPORT

The company issued a total of 78,778,405 shares and 9,750,000 unlisted incentive options during the period ended 30 June 2014.

#### *Strategy execution*

Greenearth Energy Limited ('GER') is a diversified Australian based renewable energy company with interests in technology-focussed solutions in the energy efficiency and CO<sub>2</sub>-to-fuel conversion markets, as well as suspended interests in conventional geothermal resources in Australia and the wider Pacific Rim. 2013/14 saw GER become clearly focused on this long term strategy with a heavy investment into establishing cash flow generating business units; Greenearth Energy Efficiency ('GEE') and the longer term commercialisation business unit of NewCO<sub>2</sub>Fuels ("NCF"). Due to a multitude of factors, Greenearth's Geothermal work program requirements in Australia have been suspended until further notice.

Within this report is a more detailed review of the strategy and opportunity which exists along with a summary of what was executed during the financial year to ensure GER could deliver on its strategy in the future.

These non-geothermal business units focus on both Industrial Energy Efficiency and CO<sub>2</sub>-to-Fuels sectors. Both these sectors are at a stage in when the opportunities continue to grow and become a more prominent discussion point for businesses and consumers across the globe. Subsequently, with the continued concerns around CO<sub>2</sub> in an energy constrained world, along with the ongoing development of ground breaking technologies which are financially viable, with-out government subsidies, the opportunities for Greenearth only continue to grow.

In 2013/14, Greenearth Energy took the opportunity to consider the local (Australia and New Zealand) and global markets to understand what the terms "Renewable Energy" and "Energy Efficiency" meant for our customer base. Both terms are used as 'catch-phrases' in the local and global markets in many ways, for many purposes, however what they meant for our potential customer base was quite clear: both GEE's and NCF's Industrial customer base are keenly focused on making a positive impact on the environment by reducing their ecological footprint and ensuring there is no, or limited, wastage of resources. However, given the current challenging economic climate, all solutions importantly are required to be financially viable - i.e., bring a financial return on investment which improves the businesses overall performance. GEE's current product range, and NCF's products under development, do just that. All new products we consider in the future under GEE are also reviewed for the same purposes.

In-line with the financial reports included behind this summary, the three key units above are identified within the following segment reporting units:

## GREENEARTH ENERGY LTD AND CONTROLLED ENTITIES

ACN: 120 710 625

### DIRECTORS' REPORT

Each of the three project areas within the Geothermal business unit, along with each of the other business units, represents a reportable segment (refer to note 33 to the financial statements).

#### Summary of Business Unit Operations & Background Overviews:

##### NON GEOTHERMAL OPERATIONS

###### *GREENEARTH ENERGY EFFICIENCY*

Greenearth Energy Efficiency (GEE) is a business unit focused on the integration of energy efficiency technologies into the Industrial, Warehouse and Manufacturing sector across Asia. The core current product focuses on energy efficient lighting systems. 2013/14 saw GEE continue to develop its strategy towards building proof of concept and 'pilot' sites across the sectors, whilst operationally building a platform for growth in the next financial year.

The product base continues to be received particularly keenly in sectors where facilities operate continuously and high standards around OH&S and processing standards are applied, such as the Food and Beverage Industry.

#### The highlights for 2013/14 included:

- Securing blue chip customers including Sydney Ports, Linfox, Schweppes and more
- Increased sales and market penetration to OEM customers
- Secured Metrolight and Menolinx technologies for future growth
- Hiring of key Sales and Business Development Staff to build sales
- Development and roll-out of GEE proprietary high efficiency technology: wireless and LED platforms
- Victorian Government Accreditation as an Accredited Certificate Provider for the VEET program
- Commissioning of GEE's first "cloud based monitoring" system

Further information on all of these highlights are detailed in the Quarterly reports released to the market through-out the year.

The team at GEE is consistently focused on service and operational excellence. Throughout the last financial year, we have continued to build our reputation as a reliable and trusted partner in the industrial end of the market. Providing the highest quality with tangible results. Our business model aims to deliver on the three key elements which are becoming a prevalent focus of industrial companies; environmental benefits (reductions in CO<sub>2</sub> emissions), social benefits(improved safety and office comfort levels) and economic benefits (energy savings of up to 75% per annum - directly improving profits).

We are genuinely excited about what lies ahead in 2014/15, with an expectation of revenue growth and additional product lines just a small part of what we see ahead for the GEE business.

## GREENEARTH ENERGY LTD AND CONTROLLED ENTITIES

ACN: 120 710 625

### DIRECTORS' REPORT

#### *NewCO<sub>2</sub> FUELS*

The 2013/14 financial year was an extremely exciting one for the NewCo2Fuels business. Off the back of successful results in the Stage 1 and 2 testing completed during the year, June 2014 saw Greenearth Energy Ltd (Greenearth) advise that the Group received a new agreement in respect of its investment in NewCo2Fuels Israel (NCF) as detailed in Note 15 of the Financial Statement. Under this agreement, Greenearth has commenced payments to NCF, with the first instalment in June 2014 and the remainder of the USD\$3m investment due by January 2015. The investment is subject to partial claw-back by NCF should less than USD\$3m be ultimately invested by Greenearth and is detailed further in this report.

On completion of the investment, Erdi Fuels Pty Ltd (Erdi Fuels) and Greenearth will be equal shareholders in NCF at 33.33 percent each and the remaining percentage of NCF Shares will continue to be held by founders, current staff and Yeda Research & Development Co. Ltd. (Yeda), based at the Weizmann Institute in Israel.

In completing both Stage 1 and 2 testing of the NCF system during 2013/14, both the Excess Heat and Solar Energy heat source models have now been proven. These were the key steps required prior to initiating the commercialisation phase. Subsequent to this completion, the last quarter of 2013/14 saw NCF move from the R&D phase of the business, to ongoing development and commercialisation via developing international partnerships and opportunities for trial / deployment of the equipment.

#### **The highlights for the year included:**

- Successful completion of Proof of Concept testing;
  - > *Completion of Stage 1:  
Proof of technology assembly & commencement of testing - Excess Heat*
  - > *Completion of Stage 2:  
Proof of technology assembly & commencement of testing - Renewable/Solar*
- Improved disassociation rates by a factor of 800 times on original tests in 2010
  - > *i.e. The cost per unit disassociation reduced by 34 times*
- NCF signed two commercialisation agreements with global conglomerates
- Detailed discussions with industry partners on NCF's Industrial excess heat configurations
- Worley Parsons Independent technical review completed with positive feedback

2013/14 was an extremely exciting year for the team at NCF. With many world-firsts accomplished and the beginning of a commercialisation program which is receiving a great deal of interest from industry, the team should be congratulated for their efforts.

We are very happy with our decision to invest further into the NCF business in June 2014 with the intention of helping the business move forwards to the next phase. We are excited by what lies ahead within the next 12 months and will continue to provide updates as more progress is made.

## GREENEARTH ENERGY LTD AND CONTROLLED ENTITIES

ACN: 120 710 625

### DIRECTORS' REPORT

#### GEOTHERMAL OPERATIONS

After an initially challenging start to the financial year, 2013/14 saw Greenearth Energy suspend its local (Australian) Geothermal work program requirements until further notice. As documented in the quarterly reports, the team held various discussions with departments within the Victorian Government and the Federal Government's Australian Renewable Energy Agency (ARENA) around the current and future potential for Geothermal in Victoria and wider Australia which did not provide management with the confidence to progress these ventures at this point in time. The outlook for Geothermal continues to be a slow process and without direct support from the Federal or State Governments, we do not hold high expectations for industry developments. Additionally, the Victorian Government has a ban on both drilling and Hydraulic Fracturing which is due to be reviewed in the 2015 calendar year.

The ongoing discussions with the Victorian Government, specifically the Department of State Development, Business and Innovation ('DSDBI') (formerly the Department of Primary Industry), pertains to legislated requirements of the Geothermal Energy Resources Act 2005 and the renewal process for Geothermal leases. As announced in March 2014, Greenearth Energy secured a suspension of work program requirements from the Victorian Government for all three of its existing geothermal exploration permits, and an extension of permit terms as follows:

- Geothermal Exploration Permit 10  
(located in the greater Geelong / Anglesea region)
  
- Geothermal Exploration Permit 12  
(located in the greater Latrobe Valley region)
  
- Geothermal Exploration Permit 13  
(located in the greater Latrobe Valley region)

#### Otway Basin: Geelong Geothermal Power Project ('GGPP') (GEP 10)

As announced on the 26th August 2013, Greenearth Energy received formal notification from the Australian Renewable Energy Agency (ARENA) that our Expression of Interest (EOI) for funding, applied for in March 2013, was unsuccessful. Subsequently, on 1 October 2013, GER received formal notification from the Victorian Government that the \$25million grant under the Energy Technology Innovation Strategy ('ETIS') funding agreement had been terminated. Greenearth Energy maintains that the GGPP is a worthwhile geothermal prospect for Australia, however the work program requirements of this project are suspended until further notice given the Victorian Government's current position on Hydraulic Fracturing ('fracking').

#### Gippsland Basin: Latrobe Valley (GEP 12 & GEP 13)

The Latrobe Valley is an exciting geothermal prospect as thick insulating coals overlay the hot sediments across this region. Greenearth is working with a consortium of Universities and Industry partners to develop an innovative geoscience program which will integrate advanced and emerging geological, geophysical and petrophysical technologies to understand the potential native productivity and the potential to enhance this through stimulation. Matrix, fracture and fault permeability will be differentiated and an advanced uncertainty analysis will be developed to quantify uncertainties.

## **GREENEARTH ENERGY LTD AND CONTROLLED ENTITIES**

ACN: 120 710 625

### **DIRECTORS' REPORT**

Success will lead to greater exploration success for the Australian geothermal industry and a decision regarding a deep well in the Latrobe Valley by Greenerth Energy, however this project is suspended until further notice given the Victorian Governments current position on fraccing.

### **INDONESIA**

Geothermal resources are an increasingly significant source of renewable energy within Indonesia. It has been documented that the viable resource may be as high as 28,000 Megawatts(MW), representing 40% of the worlds potential resources. The Indonesian government is actively pursuing Geothermal Energy over the next 15 years, with the publicised target of wanting to produce more than 9,000MW by 2025, equating to 5% of the country's energy output.

Greenerth Energy maintains an interest in relation to continuing to explore the possibility of geothermal projects within Indonesia.

### **GEOHERMAL RESERVES AND RESOURCES**

Greenerth Energy Ltd has Inferred Geothermal Resources for two distinct areas, Geelong/Anglesea Region and the onshore Gippsland inclusive of the Latrobe Valley and Wombat Geothermal play situated near Seaspray. Additional work has also been undertaken targeting a specific area of the Geelong/Anglesea Area, which has been defined as the Geelong Geothermal Power Project ('GGPP').

The Inferred Geothermal Resources were announced in the 2009 Financial Year. While work is ongoing to continually revise and advance the category of our reserves and resources, they have not materially changed during the 2013/14 Financial Year.

**GREENEARTH ENERGY LTD AND CONTROLLED ENTITIES**

ACN: 120 710 625

**DIRECTORS' REPORT**

The following table provides a summary of the Company's Inferred Resources:

	Geelong/ Anglesea Area (GEP 10) GER 100%	Geelong/ Anglesea Area (GEP 10) GER 100%	Geelong Geothermal Power Project (GEP 10) GER 100%	Wombat Geothermal Play (GEP13) GER 100%
Geothermal Resource Estimation Category Achieved	Inferred	Inferred	Inferred	Inferred
Geothermal Resource Type	Hot Sedimentary Aquifer (HSA)	Enhanced Geothermal System (EGS)	Hot Sedimentary Aquifer (HSA)	Hot Sedimentary Aquifer (HSA)
Estimated Thermal Energy	40,000 PJ	220,000 PJ	17,000 PJ	3,600 PJ
Heat Flow	90mW/m <sup>2</sup>	90mW/m <sup>2</sup>		
Estimated Volume of Target Reservoir	107 km <sup>3</sup>	549 km <sup>3</sup>	55 km <sup>3</sup>	14.8 km <sup>3</sup>
Average Temperature	150 <sup>o</sup> C -225 <sup>o</sup> C with uncertainty of ±15 <sup>o</sup> C	Unknown	188 <sup>o</sup> C	157 <sup>o</sup> C

**Competent Persons**

*Anglesea (Geelong) and Wombat regions*

The information in this report that related to Geothermal Resources in the Geelong Anglesea (GEP 10) and the Wombat Geothermal Play near Seaspray, Gippsland (GEP 13) has been compiled by Dr Graeme Beardsmore, an employee of Hot Dry Rocks Pty Ltd (HDRPL). The resource estimate for the Geelong Geothermal Power Project, just north of Anglesea draws upon a series of reports for Greenerth Energy by HDRPL.

Dr Beardsmore has over 15 years experience in the determination of crustal temperatures relevant to the style of geothermal play under consideration, is a member of the Australian Society of Exploration Geophysicists and abides by the Code of Ethics of that organization.

Dr Beardsmore qualifies as a Competent Person, as defined in the Australian Code for Reporting of Exploration Results, Geothermal Resources and Geothermal Reserves (2008 Edition). Dr Beardsmore consents to the public release of this report in the form and context in which it appears.

*Geelong Geothermal Power Project*

The information in this report that relates to Geothermal Resource estimation for the Geelong Geothermal Power Project (GGPP) is based upon a report compiled by James Vincent Lawless, an employee and Principal of Sinclair Knight Merz Limited (SKM). He is a Fellow of the Australasian Institute of Mining and Metallurgy and holds Chartered Geologist status with that body. SKM has been engaged as Consultant by Greenerth Energy but holds no financial interest in the project or in Greenerth Energy.

Mr Lawless is a Competent Person as defined by the Australian Code for Reporting of Exploration Results, Geothermal Resources and Geothermal Reserves (2008 Edition), and consents to the public release of this report in the form and context in which it appears.

## GREENEARTH ENERGY LTD AND CONTROLLED ENTITIES

ACN: 120 710 625

### DIRECTORS' REPORT

#### Significant changes in the state of affairs

In the opinion of the directors, there were no significant changes in the state of affairs of the group that occurred during the year other than those listed in the review of operations above.

#### After balance date events

Subsequent to the end of the period, the company issued a total of 1,200,000 unlisted incentive options to employees on 22 August 2014 pursuant to the company's Employee Option Plan, as follows:

<u>No. of options</u>	<u>Exercise price</u>	<u>Expiry date</u>
100,000	15 cents	30 September 2017
100,000	20 cents	30 September 2017
500,000	15 cents	30 June 2019
500,000	20 cents	30 June 2019
<u>1,200,000</u>		

#### Likely developments

Greenearth Energy Ltd intends to continue to focus on our three main areas of business in 2014/15, being Energy Efficiency, NewCO2Fuels and, depending on Victorian Government decisions relating to the sector, our Geothermal resources in Australia. We will further grow and develop the energy efficiency business unit with a marketing and sales focus, along with the potential for additional aligned product ranges, while we look forward to seeing continued successful progress from the NewCO2Fuels technology team in Israel.

#### Environmental regulation

The company holds interests in geothermal exploration permits and licenses in Victoria. All of these permits and licences impose regulations regarding environmental issues. Similarly, a number of our renewable technology projects are subject to planning regulations and approvals which incorporate appropriate environmental regulations. The consolidated entity is not aware of any significant breaches of environmental regulations during the financial year.

#### Dividend paid, recommended or declared

No dividends were paid, declared or recommended since the start of the financial year.

## GREENEARTH ENERGY LTD AND CONTROLLED ENTITIES

ACN: 120 710 625

### DIRECTORS' REPORT

#### Share options

Details of options over unissued ordinary shares granted by Greenearth Energy Ltd during or since the financial year end to directors and any of the 5 most highly remunerated officers of the company (other than the directors) are provided in the Remuneration Report which forms part of this Directors' Report.

Details of options outstanding over unissued ordinary shares of Greenearth Energy Ltd are provided in note 29 to the financial report.

No ordinary shares of Greenearth Energy Ltd were issued during or since the end of the financial year as a result of the exercise of an option.

There are no amounts unpaid on shares issued on exercise of options.

#### Directors' meetings

The number of meetings of the board of directors and of each board committee held during the financial year and the numbers of meetings attended by each director were:

	Board of Directors		Audit Committee	
	<i>Eligible to attend</i>	<i>Attended</i>	<i>Eligible to attend</i>	<i>Attended</i>
R Annells	12	12	2	2
J Kopcheff	12	12	2	2
S Marks	12	12	-	-

#### Directors' interests in shares or options

Directors' relevant interests in shares of Greenearth Energy Ltd or options over shares in the company (or a related body corporate) are detailed below.

<i>Directors' relevant interests in:</i>		<i>Ordinary shares of Greenearth Energy Ltd</i>		<i>Options over shares in Greenearth Energy Ltd</i>	
		<u>2014</u>	<u>2013</u>	<u>2014</u>	<u>2013</u>

### DIRECTORS' REPORT

#### Indemnification and insurance of directors, officers and auditors

The company has, during and since the end of the financial year, in respect of any person who has, is or has been an officer of the company or a related body corporate, paid a premium in respect of Directors and Officer liability insurance which indemnifies Directors, Officers and the Company of any claims made against the Directors, Officers of the Company and the Company, subject to conditions contained in the insurance policy. Further disclosure required under section 300(9) of the *Corporations Act 2001* is prohibited under the terms of the contract.

#### Proceedings on behalf of the consolidated entity

No person has applied for leave of Court to bring proceedings on behalf of the consolidated entity.

#### Auditor's independence declaration

A copy of the auditor's independence declaration as required under section 307C of the *Corporations Act 2001* in relation to the audit for the financial year is provided with this report.

#### Non-audit services

Non-audit services are approved by resolution of the audit committee and approval is provided in writing to the board of directors. Non-audit services were provided by the auditors of entities in the consolidated group during the year, namely Pitcher Partners (Melbourne), network firms of Pitcher Partners, and other non-related audit firms, as detailed below. The directors are satisfied that the provision of the non-audit services during the year by the auditor is compatible with the general standard of independence for auditors imposed by the *Corporations Act 2001*.

	2014	2013
	\$	\$
Amounts paid and payable to Pitcher Partners (Melbourne) for non-audit services:		
Taxation services	71,002	59,220
Total auditors' remuneration for non-audit services	<u>71,002</u>	<u>59,220</u>

ACN: 120 710 625  
REMUNERATION REPORT (AUDITED)

The directors present the consolidated entity's 2014 remuneration report which details the remuneration information for Greenearth Energy Ltd's executive directors, non-executive directors and other key management personnel.

**A. Details of key management personnel**

<i>(i) Directors</i>	<i>Position</i>
Robert Annells	Chairman - non executive
Leslie Erdi	Director - non executive (to 26 January 2013)
John Kopcheff	Director - non executive
Samuel Marks	Managing Director
Mark Miller	Director - non executive (to 7 June 2013)

<i>(ii) Executives</i>	<i>Position</i>
Urbain du Plessis	Chief Operating Officer - Energy Efficiency (from 1 October 2012)
Vicki Kahanoff	Chief Financial Officer (to 29 October 2012) and Company Secretary (to 31 December 2012)
Leslie Smith	Company Secretary (from 31 December 2012 to 2 July 2013)
Robert Smith	Chief Financial Officer (from 7 January 2013) and Company Secretary (from 2 July 2013)

**B. Remuneration policies**

The board of directors of Greenearth Energy Ltd is responsible for determining and reviewing compensation arrangements for the directors and the executive team. The board assesses the appropriateness of the nature and amount of remuneration of such officers on a periodic basis by reference to relevant employment market conditions with overall objective of ensuring maximum stakeholder benefit from the retention of a high quality board and executive team. Such officers are given the opportunity to receive their base remuneration in a variety of forms including cash and fringe benefits such as expenses payment plans.

For executives, the company provides a remuneration package that incorporates both cash-based remuneration and share-based remuneration. Bonuses are issued when Key Performance Indicators (KPI's), which are stipulated within services agreements, are met in part or full, as assessed appropriate by the Board.

The company determines the maximum amount for remuneration, including thresholds for share-based remuneration for directors, by resolution. Further details regarding components of directors' and executive remuneration are provided in the notes to the financial statements.

GREENEARTH ENERGY LTD AND CONTROLLED ENTITIES  
ACN: 120 710 625  
REMUNERATION REPORT (AUDITED)

**B. Remuneration policies (continued)**

*Service agreements*

Details of service agreements entered into by the company with key management personnel are:

**Service agreements - Executive Directors**

**Samuel Marks**

Mr Samuel Marks, who commenced as Managing Director on 1 July 2012, entered into an initial arrangement at the start of his employment with the Company with a remuneration package that includes a base salary plus superannuation. He was also issued incentive options in December 2012 and in December 2013 (as outlined in part D(b) of this Remuneration Report).

**Service agreements - Senior Executives**

Service agreements are in place for the following Senior Executives and former Senior Executives: Urbain du Plessis, Vicki Kahanoff and Robert Smith.

These agreements, which do not specify fixed periods of employment, can be terminated by either party with notice periods ranging between four and five weeks' notice. Termination payments comprise the base salary payment for the duration of the applicable notice period, plus any statutory entitlements owing, such as outstanding annual leave entitlements and superannuation contributions.

These agreements also contain KPIs, that are set in relation to objectives suitable to each executive's role, under which performance bonuses may be achieved. Where appropriate, these bonuses include components that are related to the company's performance. KPIs for operational and sales executives focus on business planning, risk and compliance, revenue targets, and profitability. KPIs for finance and governance executives focus on governance, compliance, reporting and financial management.

REMUNERATION REPORT (AUDITED)

E. Key management personnel's bonuses and share-based compensation

*(b) Details concerning bonuses and share-based compensation of directors and executives (consolidated)*

*(i) Directors' fees*

The directors decided to defer payment of directors' fees and associated superannuation totalling \$147,150 in respect of the year ended 30 June 2012, to conserve the company's cash reserves. Following approval from shareholders at the company's Annual General Meeting (AGM) in November 2012, outstanding directors' fees in respect of the year ended 30 June 2012 were settled via the issue of ordinary shares in Greenearth Energy. This resulted in the issue of 4,204,286 shares at 3.5 cents per share. No portion of this remuneration is related to company performance.

The directors decided to defer payment of directors' fees and associated superannuation totalling \$147,150 in respect of the year ended 30 June 2013, to conserve the company's cash reserves, and intended to seek approval from shareholders at the company's Annual General Meeting (AGM) in November 2013 to have those outstanding directors' fees paid via the issue of Greenearth Energy ordinary shares.

Subsequently, in October 2013, the directors concluded that fees for all individual non-executive directors would be reduced by 50%. The company also reverted to its previous practice of paying directors' fees in cash. Consequently, the anticipated directors' fees for the previous financial year (as disclosed in the Remuneration Report within the 2013 financial report) were reduced by 50% as well as reclassified from Share-based Payments to the relevant Short-Term and Post employment categories within the 2014 Remuneration Report. No portion of this remuneration is related to company performance.

*(ii) Grant of options to former Managing Director*

Following approval from shareholders at the company's Annual General Meeting (AGM) in November 2012, 5,000,000 unlisted options were issued to former Managing Director Mr Mark Miller, in recognition of the contribution made by him during his period of employment as Managing Director. The options are options to subscribe for shares in the capital of Greenearth Energy Ltd, at an exercise price of 15 cents, and expire on 30 September 2017. No portion of this remuneration is related to company performance.

*(iii) Grant of options to Managing Director*

Following approval from shareholders at the company's Annual General Meeting (AGM) in November 2013, 5,000,000 unlisted options were issued to Mr Samuel Marks, in relation to his employment as Managing Director. The options are options to subscribe for shares in the capital of Greenearth Energy Ltd (comprising 2,000,000 at an exercise price of 7.5 cents and 3,000,000 options at an exercise price of 10 cents), expire on 30 September 2018, and vested on 1 July 2014 due to Mr Marks' continuing employment with the company up until that date. No portion of this remuneration is related to company performance.

REMUNERATION REPORT (AUDITED)

E. Key management personnel's bonuses and share-based compensation (continued)

*(b) Details concerning bonuses and share-based compensation of directors and executives (consolidated) (continued)*

*(iv) Grant of options to senior executives*

2,500,000 unlisted options were issued to Key Management Personnel in relation to employment with the company. The options are options to subscribe for shares in the capital of Greenerth Energy Ltd (comprising 1,500,000 at an exercise price of 15 cents and 1,000,000 options at an exercise price of 20 cents). 500,000 options expire on 2 February 2017, and will vest on 2 February 2015 subject to continuing employment with the company up until that date. 2,000,000 options expire on 30 September 2017, and vested at grant date. No portion of this remuneration is related to company performance.

3,000,000 unlisted options were issued to Key Management Personnel in the prior year in relation to employment with the company. The options are options to subscribe for shares in the capital of Greenerth Energy Ltd (comprising 1,000,000 at an exercise price of 10 cents and 2,000,000 options at an exercise price of 15 cents), expire on 30 September 2017, and will vest on 1 October 2013 subject to continuing employment with the company up until that date. No portion of this remuneration is related to company performance.

*(c) Shares issued on exercise of compensation options*

No compensation options were exercised during the year.

REMUNERATION REPORT (AUDITED)

**G. Loans to key management personnel**

There are no loans made by Greenerth Energy Ltd to key management personnel.

**H. Other transactions with key management personnel**

An amount of \$28,596 excluding GST (2013:\$9,532) was paid by the group to Virtual and Illumination Engineering Services; a business associated with Mr U. du Plessis, a member of the key management personnel of the company in respect of research and development services provided by it to the group.

Amounts were paid to companies associated with Mr. S. R. Marks in respect of consulting services provided to the group prior to Mr Marks' commencement as Managing Director of Greenerth Energy Ltd on 1 July 2012. The amounts were \$nil (2013:\$17,625 excluding GST), paid by Greenerth Energy Ltd to Main Street Capital Pty Ltd, and \$nil (2013:\$46,125 excluding GST), paid by Greenerth Energy Ltd to Toroso Group Pty Ltd.

All amounts paid to related entities of key management personnel were charged on commercial and arms-length terms and conditions.

**I. Voting and comments made at the company's 2013 Annual General Meeting (AGM)**

At the company's most recent AGM, resolution to adopt the prior year remuneration report was put to the vote and carried as an ordinary resolution on a show of hands. No comments were made on the remuneration report that was considered at the AGM.

*End of Remuneration Report.*

Signed in accordance with a resolution of the directors.

---

Samuel R Marks

GREENEARTH ENERGY LTD AND CONTROLLED ENTITIES  
ACN: 120 710 625  
NOTES TO THE FINANCIAL STATEMENTS 30 JUNE 2014

**NOTE 1: STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES**

The following is a summary of significant accounting policies adopted by the consolidated entity in the preparation and presentation of the financial report. The accounting policies have been consistently applied, unless otherwise stated.

**(a) Basis of preparation of the financial report**

This financial report is a general purpose financial report that has been prepared in accordance with Australian Accounting Standards, Interpretations and other authoritative pronouncements of the Australian Accounting Standards Board and the *Corporations Act 2001*.

The financial report covers Greenearth Energy Ltd and controlled entities as a consolidated entity. Greenearth Energy Ltd is a company limited by shares, incorporated and domiciled in Australia. Greenearth Energy Ltd is a for-profit entity for the purpose of preparing the financial statements.

The financial report was authorised for issue by the Directors as at the date of the Directors' report.

*Compliance with IFRS*

The consolidated financial statements of Greenearth Energy Ltd also comply with the International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB).

*Historical cost convention*

The financial report has been prepared under the historical cost convention, as modified by revaluations to fair value for certain classes of assets as described in the accounting policies.

*Critical accounting estimates*

The preparation of the financial report requires the use of certain estimates and judgements in applying the entity's accounting policies. Those estimates and judgements significant to the financial report are disclosed in Note 2.

**(b) Going Concern**

The Directors have prepared the financial report on a going concern basis, which contemplates continuity of normal business activities and the realisation of assets and the settlement of liabilities in the ordinary course of business.

The consolidated entity incurred a net loss for the year of \$226,112 (2013: \$1,612,998) and at the reporting date total assets exceeded total liabilities by \$5,971,095 (30 June 2013: \$1,512,559), including exploration and evaluation assets of \$2,146,783 (30 June 2013: \$2,134,401).

GREENEARTH ENERGY LTD AND CONTROLLED ENTITIES  
ACN: 120 710 625  
NOTES TO THE FINANCIAL STATEMENTS 30 JUNE 2014

**NOTE 1: STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES (continued)**

**(b) Going Concern (continued)**

The Directors have determined that there may be a net cash requirement of \$1,001,000 over the forthcoming 12 months to maintain operations, after allowing for existing cash reserves and contracted upcoming cash receipts. The Directors anticipate that this potential net cash requirement of \$1,001,000 is to be funded by a combination of the net operating cash flow of Greenearth Energy Efficiency Pty Ltd ("GEE", a company within the consolidated group), raising additional capital, and other funding avenues such as continued development of other renewable technologies and expanding revenue streams.

The anticipated revenue growth (and consequent cash flow contribution) of GEE over the next 12 months is based on certain assumptions in relation to the short-term development of the business. These assumptions relate to the expected future revenue and profitability of GEE during that time and are based on currently available information including management assessments of probable future orders and other information.

The financial report does not include any adjustment relating to the recoverability or classification of recorded asset amounts nor to the amounts or classification of liabilities that might be necessary should the consolidated entity be unable to trade as forecast or to raise sufficient funding to continue as a going concern.

If the going concern basis of accounting is found to no longer be appropriate, the recoverable amount of the assets shown in the Consolidated Statement of Financial Position are likely to be significantly less than the amounts disclosed and the extent of liabilities may differ significantly from those reflected.

**(c) Principles of consolidation**

The consolidated financial statements are those of the consolidated entity, comprising the financial statements of the parent entity and of all entities which the parent entity controls. The group controls an entity when it is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity.

The financial statements of subsidiaries are prepared for the same reporting period as the parent entity, using consistent accounting policies. Adjustments are made to bring into line any dissimilar accounting policies, which may exist.

All inter-company balances and transactions, including any unrealised profits or losses have been eliminated on consolidation. Subsidiaries are consolidated from the date on which control is established and are de-recognised from the date that control ceases.

Non-controlling interests in the results of subsidiaries are shown separately in the consolidated statement of comprehensive income and consolidated statement of financial position respectively.

**NOTE 1: STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES (continued)**

**(d) Revenue**

Revenue from the sale of goods is recognised when the significant risks and rewards of ownership of the goods have passed to the buyer and the costs incurred or to be incurred in respect of the transaction can be measured reliably. Risks and rewards of ownership are considered to have passed to the buyer at the time of delivery of the goods to the customer.

Revenue from rendering of services to customers is recognised upon delivery of the service to the customer.

In respect of sales of investments and creation of options the proceeds arising from sale are recognised when control of the asset is passed to the acquirer.

Government grants are recognised at fair value when there is reasonable certainty that the grant will be received and all grant conditions met. Grants relating to expense items are recognised as income over the periods necessary to match the grant to the costs they are compensating.

Interest revenue is recognised when it becomes receivable on a proportional basis taking into account the interest rates applicable to the financial assets.

All revenue is stated net of the amount of goods and services tax (GST).

**(e) Cash and cash equivalents**

Cash and cash equivalents include cash on hand and at banks, short-term deposits with an original maturity of three months or less held at call with financial institutions.

**(f) Inventories**

Inventories are measured at the lower of cost and net realisable value.

**(g) Property, plant and equipment**

*Cost and valuation*

All classes of property, plant and equipment are stated at cost less depreciation and any accumulated impairment losses.

*Depreciation*

The depreciable amounts of all fixed assets are calculated using the diminishing balance method over their estimated useful lives commencing from the time the asset is held ready for use.

NOTE 1: STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(g) Property, plant and equipment (continued)

Leasehold improvements are depreciated over the shorter of either the unexpired period of the lease or the estimated useful lives of the improvements.

The useful lives for each class of assets are:

	2014	2013
Computer equipment	3 years	3 years
Office equipment	6 years	6 years
Leasehold improvements	the lease term	the lease term

(h) Exploration and evaluation costs

Costs arising from exploration activities are carried forward provided such costs are expected to be recouped through successful development or sale, or exploration activities have not reached a stage which permits a reasonable assessment of the existence or otherwise of economically recoverable reserves. AASB 6 "Exploration for and Evaluation of Mineral Resources" requires that the company perform impairment tests on those assets when facts and circumstances suggest that the carrying amount may be impaired. The impairment testing has been aligned with the factors that must currently be satisfied for capitalisation of exploration and evaluation costs.

Exploration expenses are recognised on a net basis, after offsetting grant income and exploration expenditure written off.

Costs carried forward in respect of an area of interest that is abandoned are written off in the year in which the decision to abandon is made.

*Amortisation*

The entity does not currently have any production areas.

*Restoration costs*

Restoration costs that are expected to be incurred are provided for as part of the cost of the exploration, evaluation, development, construction or production phases that give rise to the need for restoration. Accordingly, these costs are recognised gradually over the life of the facility as these phases occur. The costs include obligations relating to reclamation, waste site closure, platform removal and other costs associated with the restoration of the site. These estimates of the restoration obligations are based on anticipated technology and legal requirements and future costs that have been discounted to their present value. Any changes in the estimates are adjusted on a retrospective basis. In determining the restoration obligations, the entity has assumed no significant changes will occur in the relevant Federal and State legislation in relation to restoration of such wells in the future.

**NOTE 1: STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES (continued)**

**(i) Leases**

Leases are classified at their inception as either operating or finance leases based on the economic substance of the agreement so as to reflect the risks and benefits incidental to ownership.

*Operating leases*

Lease payments for operating leases are recognised as an expense on a straight-line basis over the term of the lease. The group currently has no equipment rental operating leases.

The group currently has no finance leases.

**(j) Business combinations**

A business combination is a transaction or other event in which an acquirer obtains control of one or more businesses and results in the consolidation of the assets and liabilities acquired. Business combinations are accounted for by applying the acquisition method.

The consideration transferred is determined as the aggregate of fair values of assets given, equity issued and liabilities assumed in exchange for control.

Goodwill is recognised initially at the excess over the aggregate of the consideration transferred and the acquisition date fair value of the acquirer's previously held equity interest (in case of step acquisition), less the fair value of the identifiable assets acquired and liabilities assumed.

If the fair value of the acquirer's interest is greater than the aggregate of the consideration transferred, the fair value of the non-controlling interest, and the acquisition date fair value of the acquirer's previously held equity interest (in case of step acquisition), the surplus is immediately recognised in the statement of comprehensive income.

Acquisition related costs are expensed as incurred.

**(k) Intangibles**

*Research and development*

Expenditure on research activities is recognised as an expense when incurred.

Expenditure on development activities is capitalised only when technical feasibility studies demonstrate that the project will deliver future economic benefits and these benefits can be measured reliably. Capitalised development expenditure is stated at cost less accumulated amortisation. Amortisation commences when the intangible asset is available for use. Other development expenditure is recognised as an expense when incurred.

**NOTE 1: STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES (continued)**

**(l) Impairment of non-financial assets**

Assets with an indefinite useful life are not amortised but are tested annually for impairment in accordance with AASB 136. Assets subject to annual depreciation or amortisation are reviewed for impairment whenever events or circumstances arise that indicate that the carrying amount of the asset may be impaired.

Exploration and evaluation assets are tested for impairment when facts and circumstances suggest that the carrying amount of an exploration and evaluation asset may exceed its recoverable amount in accordance with AASB 6.

An impairment loss is recognised where the carrying amount of the asset exceeds its recoverable amount. The recoverable amount of an asset is defined as the higher of its fair value less costs to sell and value in use.

**(m) Income tax**

Current income tax expense or revenue is the tax payable on the current period's taxable income based on the applicable income tax rate adjusted by changes in deferred tax assets and liabilities.

*Deferred tax balances*

Deferred tax assets and liabilities are recognised for temporary differences at the applicable tax rates when the assets are expected to be recovered or liabilities are settled. No deferred tax asset or liability is recognised in relation to temporary differences if they arose in a transaction, other than a business combination, that at the time of the transaction did not affect either accounting profit or taxable profit or loss.

Deferred tax assets are recognised for deductible temporary differences and unused tax losses only if it is probable that future taxable amounts will be available to utilise those temporary differences and losses.

Current and deferred tax balances attributable to amounts recognised directly in equity are also recognised directly in equity.

*Tax consolidation*

Greenearth Energy Limited and its wholly-owned Australian resident entities formed a tax-consolidated group with effect from 1 July 2012. Greenearth Energy Limited is the head entity of the tax-consolidated group. The members of the tax-consolidated group are identified in note 30.

NOTE 1: STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(m) Income tax (continued)

The members of the tax-consolidated group have entered into a tax funding agreement, stipulating that amounts are recognised as payable to or receivable by the company and each member of the group in relation to the tax contribution amounts paid or payable between the parent entity and the other members of the tax-consolidated group in accordance with the agreement. Under the terms of the tax funding agreement, Greenearth Energy Limited and each of the entities in the tax-consolidated group will agree to pay a tax equivalent payment to or from the head entity, based on the current tax liability or current tax asset of the entity.

The tax-consolidated group also has a tax sharing agreement in place to limit the liability of subsidiaries in the tax-consolidated group arising under the joint and several liability requirements of the tax consolidation system, in the event of default by the parent entity to meet its payment obligations.

(n) Provisions

Provisions are recognised when the consolidated entity has a legal or constructive obligation, as a result of past events, for which it is probable that an out flow of economic benefits will result and that outflow can be reliably measured.

(o) Employee benefits

*(i) Short-term employee benefit obligations*

Liabilities arising in respect of wages and salaries, annual leave, accumulated sick leave and any other employee benefits expected to be settled within twelve months of the reporting date are measured at the amounts based on remuneration rates which are expected to be paid when the liability is settled. The expected cost of short-term employee benefits in the form of compensated absences such as annual leave is recognised in the provision for employee benefits. All other short-term employee benefit obligations are presented as payables.

*(ii) Long-term employee benefit obligations*

The provision for employee benefits in respect of long service leave and annual leave which are not expected to be settled within twelve months of the reporting date, are measured at the present value of the estimated future cash outflow to be made in respect of services provided by employees up to the reporting date.

Employee benefit obligations are presented as current liabilities in the balance sheet if the entity does not have an unconditional right to defer settlement for at least twelve months after the reporting date, regardless of when the actual settlement is expected to occur.

**NOTE 1: STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES (continued)**

**(o) Employee benefits (continued)**

*(iii) Retirement benefit obligations*

Defined contribution superannuation plans:

The consolidated entity makes contributions to defined contribution superannuation plans in respect of employee services rendered during the year. These superannuation contributions are recognised as an expense in the same period when the employee services are received.

*(iv) Bonus plan*

The consolidated entity recognises a provision when a bonus is payable in accordance with the employee's contract of employment, and the amount can be reliably measured.

*(v) Share-based payments*

The consolidated entity operates a share-based payment employee share option plan. The fair value of the equity to which employees become entitled is measured at grant date and recognised as an expense over the vesting period, with a corresponding increase to an equity account. The fair value of shares is measured at the market bid price at grant date. In respect of share-based payments that are dependent on the satisfaction of performance conditions, the number of shares and options expected to vest is reviewed and adjusted at each reporting date. The amount recognised for services received as consideration for these equity instruments granted is adjusted to reflect the best estimate of the number of equity instruments that eventually vest.

**(p) Third party share-based payments**

From time to time share options are granted to third parties for services rendered. The fair value of the equity to which third parties become entitled is determined by reference to the value of services provided, and recognised as an expense over the period(s) when the services were provided.

**(q) Financial instruments**

*Classification*

The consolidated entity classifies its financial instruments in the following categories: financial assets at fair value through profit or loss, loans and receivables, held-to-maturity investments, and available-for-sale financial assets. The classification depends on the purpose for which the instruments were acquired. Management determines the classification of its financial instruments at initial recognition.

NOTE 1: STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(q) Financial instruments (continued)

*Non-derivative financial instruments*

Non-derivative financial instruments consist of investments in equity and debt securities, trade and other receivables, cash and cash equivalents, loans and borrowings, and trade and other payables.

Non-derivative financial instruments are initially recognised at fair value, plus directly attributable transaction costs (if any), except for instruments recorded at fair value through profit and loss. After initial recognition, non-derivative financial instruments are measured as described below.

*Financial assets at fair value through profit or loss*

Investments in listed securities are carried at fair value through profit and loss. They are measured at their fair value at each reporting date and any increment or decrement in fair value from the prior period is recognised in the profit and loss of the current period. Fair value of listed investments are based on closing prices at the reporting date.

*Held-to-maturity investments*

Fixed term investments intended to be held to maturity are classified as held-to-maturity investments. They are measured at amortised cost using the effective interest rate method.

*Loans and receivables*

Loans and receivables are measured at fair value at inception and subsequently at amortised cost using the effective interest rate method.

*Available-for-sale*

Available-for-sale financial assets include any financial assets not included in the above categories and are measured at fair value. Unrealised gains and losses arising from changes in fair value are taken directly to equity. The cumulative gain or loss is held in equity until the financial asset is de-recognised, at which time the cumulative gain or loss held in equity is recognised in profit and loss.

Non-listed investments for which fair value cannot be reliably measured, are carried at cost and tested for impairment.

NOTE 1: STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(q) Financial instruments (continued)

*Financial liabilities*

Financial liabilities include trade payables, other creditors, loans from third parties and loans or other amounts due to director-related entities.

Non-derivative financial liabilities are recognised at amortised cost, comprising original debt less principal payments and amortisation.

Financial liabilities are classified as current liabilities unless the consolidated entity has an unconditional right to defer settlement of the liability for at least 12 months after the reporting date.

*Impairment of financial assets*

Financial assets are tested for impairment at each financial year end to establish whether there is any objective evidence for impairment.

For loans and receivables or held-to-maturity investments carried at amortised cost, impairment loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The amount of the loss reduces the carrying amount of the asset and is recognised in profit or loss. The impairment loss is reversed through profit or loss if the amount of the impairment loss decreases in a subsequent period and the decrease can be related objectively to an event occurring after the impairment was recognised.

For available-for-sale financial assets carried at cost, impairment loss is measured as the difference between the carrying amount and the present value of estimated future cash flows discounted at the current market rate of return for a similar financial asset. Such impairment loss is not reversed.

For available-for-sale financial assets carried at fair value through other comprehensive income, the impairment loss is measured as the difference between the acquisition cost and current fair value, less any impairment loss previously recognised in profit or loss. If the asset is impaired, the cumulative loss is reclassified from equity to the profit or loss. For equity investments, the impairment loss is not reversed through profit or loss. For debt investments, the impairment loss is reversed through profit or loss if the fair value increases in a subsequent period and the increase can be objectively related to an event occurring after the impairment losses was recognised in profit or loss.

NOTE 1: STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(r) Investments in associates

An associated entity is an entity over which the consolidated entity is able to exercise significant influence.

The consolidated entity's interests in associates are brought to account using the equity method after initially being recognised at cost. Under the equity method, the profits or losses of the associate is recognised in profit or loss and the share of other comprehensive income items is recognised in other comprehensive income. Details relating to associates are set out in Note 15(a).

Unrealised gains and losses on transactions between the consolidated entity and an associate are eliminated to the extent of the entity's share in an associate.

(s) Share capital

Issued and paid up capital is recognised at the fair value of the consideration received by the company.

Any transaction costs arising on the issue of ordinary shares are recognised directly in equity as a reduction of the share proceeds received.

(t) Foreign currency

*Functional and presentation currency*

The financial statements of each entity within the consolidated entity are measured using the currency of the primary economic environment in which that entity operates (the functional currency). The consolidated financial statements are presented in Australian dollars which is the consolidated entity's functional and presentation currency.

*Transactions and balances*

Transactions in foreign currencies of entities within the consolidated group are translated into functional currency at the rate of exchange ruling at the date of the transaction.

Foreign currency monetary items that are outstanding at the reporting date (other than monetary items arising under foreign currency contracts where the exchange rate for that monetary item is fixed in the contract) are translated using the spot rate at the end of the financial year.

All resulting exchange differences arising on settlement or re statement are recognised as revenues and expenses for the financial year.

**NOTE 1: STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES (continued)**

**(t) Foreign currency (continued)**

*Foreign subsidiaries*

Entities that have a functional currency different to the presentation currency are translated as follows:

- Assets and liabilities are translated at year-end exchange rates prevailing at that reporting date;
- Income and expenses are translated at actual exchange rates or average exchange rates for the period, where appropriate; and
- All resulting exchange differences are recognised as a separate component of equity.

**(u) Comparatives**

Where necessary, comparative information has been reclassified and repositioned for consistency with current year disclosures.

**(v) Goods and services tax (GST)**

Revenues, expenses and assets are recognised net of the amount of GST, except where the amount of GST incurred is not recoverable from the Tax Office. In these circumstances the GST is recognised as part of the cost of acquisition of the asset or as part of an item of the expense. Receivables and payables in the statement of financial position are shown inclusive of GST.

Cash flows are presented in the statement of cash flows on a gross basis, except for the GST component of investing and financing activities, which are disclosed as operating cash flows.

**(w) Adoption of new and amended accounting standards that are first operative at 30 June 2014**

*AASB 10: Consolidated Financial Statements*

The consolidated financial statements are those of the consolidated entity, comprising the financial statements of the parent entity and of all entities which the parent controls. The group controls an entity when it is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity.

The consolidated entity concluded that the adoption of AASB 10 did not change the consolidation status of its subsidiaries. Therefore, no adjustments to any of the carrying amounts were required.

NOTE 1: STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES (continued)

- (w) Adoption of new and amended accounting standards that are first operative at 30 June 2014 (continued)

*AASB 11: Joint Arrangements*

Under AASB 11, investments in joint arrangements are classified as either joint operations or joint ventures depending on the rights and obligations of the parties to the arrangement, rather than the legal structure of joint arrangements.

If the parties share the right to the net assets of the joint arrangement, these parties are parties to a joint venture. A joint venturer accounts for an investment in the arrangement using the equity method, and the choice to proportionately consolidate is no longer permitted.

If the parties share the right to the separate assets and obligations for the liabilities of the joint arrangement, these parties are parties to a joint operation. A joint operator accounts for assets, liabilities and corresponding revenues and expenses arising from the arrangement by recognising their share of interest in each item.

The consolidated entity concluded that the adoption of AASB 11 had no impact on the composition or performance of the consolidated entity. Therefore, no adjustments to any of the carrying amounts were required.

*AASB 12: Disclosure of Interests in Other Entities*

AASB 12 sets new minimum disclosure requirements for interest in subsidiaries, joint arrangements, associates and unconsolidated structured entities. Disclosures required under AASB 12 are provided in Note 15: Equity Accounted Investments and Note 30: Interests In Subsidiaries.

*AASB 13: Fair Value Measurement*

AASB 13 introduces a fair value framework for all fair value measurements as well as the enhanced disclosure requirements. Application of AASB 13 does not materially change the company's fair value measurements. However, the additional disclosures required under AASB 13 are provided in Note 4: Fair Value Measurements.

*AASB 119: Employee Benefits*

The amendments to AASB 119 revise the definitions of short term and long term employee benefits, placing the emphasis on when the benefit is expected to be settled rather than when it is due to be settled. The group has assessed its impact and concludes that the adoption of AASB 119 has no material effect on the amounts recognised in current or prior years.

GREENEARTH ENERGY LTD AND CONTROLLED ENTITIES  
ACN: 120 710 625  
NOTES TO THE FINANCIAL STATEMENTS 30 JUNE 2014

NOTE 1: STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(w) Adoption of new and amended accounting standards that are first operative at 30 June 2014 (continued)

No other new and amended accounting standards effective for the financial year beginning 1 July 2013 affected any amounts recorded in the current or prior year.

(x) Accounting standards and interpretations Issued but not Operative at 30 June 2014

The following standards and interpretations have been issued at the reporting date but are not yet effective. The directors' assessment of the impact of these standards and interpretations is set out below.

(i) AASB 9 Financial Instruments, AASB 2009-11 Amendments to Australian Accounting Standards arising from AASB 9, AASB 2010-7 Amendments to Australian Accounting Standards arising from AASB 9 (December 2010), AASB 2012-6 Amendments to Australian Accounting Standards - Mandatory Effective Date of AASB 9 and Transition Disclosure and AASB 2013-9 Amendments to Australian Accounting Standards - Conceptual Framework, Materiality and Financial Instruments (effective from 1 January 2017)

AASB 9 Financial Instruments improve and simplify the approach for classification and measurement of financial assets compared with the requirements of AASB 139. When adopted, the standard could change the classification and measurement of financial assets. AASB 9 only permits the recognition of fair value gains and losses in other comprehensive income for equity investments that are not held for trading. In the current reporting period, the group did not recognise any amounts in other comprehensive income in relation to the movements in the fair value of available for sale financial assets, which are not held for trading.

Most of the requirements for financial liabilities were carried forward unchanged. However, some changes were made to the fair value option for financial liabilities to address the issue of own credit risk. The consolidated entity does not have any financial liabilities that are designated at fair value through profit or loss. The new requirements only affect the accounting for financial liabilities that are designated at fair value through profit or loss. Therefore, there will be no impact on the consolidated entity's accounting for financial liabilities.

In December 2013, new general hedge accounting requirements were incorporated into AASB 9. The new model aligns hedge accounting more closely with risk management, and will be easier to apply and reduce the costs of implementation. However, the new model requires extended disclosure. The standard is not applicable until 1 January 2017 but is available for early adoption. The consolidated entity has yet to assess the impact of new general hedge accounting model on its hedge arrangements. The consolidated entity has decided not to early adopt AASB 9 at 30 June 2014.

Other standards and interpretations have been issued at the reporting date but are not yet effective. When adopted, these standards and interpretations are likely to impact on the financial information presented. However the assessment of impact has not yet been completed.

**NOTE 2: CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS**

Certain accounting estimates include assumptions concerning the future, which, by definition, will seldom represent actual results. Estimates and assumptions based on future events have a significant inherent risk, and where future events are not as anticipated there could be a material impact on the carrying amounts of the assets and liabilities discussed below:

**(a) Impairment of non-financial assets other than goodwill**

All assets are assessed for impairment at each reporting date by evaluating whether indicators of impairment exist in relation to the continued use of the asset by the consolidated entity. Impairment triggers include declining product or manufacturing performance, technology changes, adverse changes in the economic or political environment or future product expectations. If an indicator of impairment exists the recoverable amount of the asset is determined.

**(b) Income tax**

Deferred tax assets and liabilities are based on the assumption that no adverse change will occur in the income tax legislation and the anticipation that the group will derive sufficient future assessable income to enable the benefit to be realised and comply with the conditions of deductibility imposed by the law.

Deferred tax assets arising from tax losses are not recognised at balance date as realisation of the benefit is not probable.

**(c) Fair value measurements**

Certain financial assets and liabilities are measured at fair value. Fair values have been determined in accordance with fair value measurement hierarchy. Refer to Note 4 for the details of the fair value measure key assumptions and inputs.

**(d) Employee benefits**

Calculation of long term employment benefits requires estimation of the retention of staff, future remuneration levels and timing of the settlement of the benefits. The estimates are based on historical trends.

**(e) Share based payments**

Calculation of share based payments requires estimation of the timing of the exercise of the underlying equity instrument. The estimates are based on historical trends and are calculated using the Black Scholes method.

NOTE 2: CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS (continued)

(f) Deferred exploration expenditure

Exploration expenditure is carried forward when management expect that the expenditure can be recouped through successful development and exploration of the area of interest. In this event management will consider impairment of deferred exploration expenditure in accordance with note 1(h) and 1(k).

Where sufficient data does not exist to indicate successful development and there is an ongoing commitment to significant exploration in the area of interest, the exploration expenditure is carried forward.

(g) Provision for restoration costs

Restoration costs that are expected to be incurred are provided for as part of the cost of the deferred exploration expenditure. The costs include obligations relating to reclamation, waste site closure, platform removal and other costs associated with the restoration of the site. These costs are estimated and are based on the anticipated technology and legal requirements and future costs. These costs are also dependent on there being no significant changes to relevant federal and state legislation.

GREENEARTH ENERGY LTD AND CONTROLLED ENTITIES  
ACN: 120 710 625  
NOTES TO THE FINANCIAL STATEMENTS 30 JUNE 2014

**NOTE 3: FINANCIAL RISK MANAGEMENT**

The consolidated entity is exposed to a variety of financial risks comprising:

- Market price risk
- Currency risk
- Interest rate risk
- Credit risk
- Liquidity risk

The board of Directors has overall responsibility for identifying and managing operational and financial risks.

The consolidated entity holds the following financial instruments:

	Note	2014 \$	2013 \$
<b>Financial assets</b>			
Cash and cash equivalents	10	3,187,415	333,608
Receivables	11	353,925	892,207
Financial assets at fair value through profit and loss classified as held for trading	13	15,702	8,636
Security deposits for exploration permits	13	54,124	54,124
		<u>3,611,166</u>	<u>1,288,575</u>
<b>Financial liabilities</b>			
Payables	18	891,620	898,263
Other financial liabilities	19	530,786	-
		<u>1,422,406</u>	<u>898,263</u>

**(a) Market price risk**

Market or price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk).

Investments in listed securities at fair value through profit and loss are measured at fair value at reporting date based on quoted market prices.

Investments in non-listed securities are made after an assessment has been made in terms of how the investment achieves or enhances the company's abilities of achieving its corporate objectives. To determine the fair value of these investments and monitor their performance, assessments of similar listed securities are undertaken and comparisons are made. When assessments are carried out a number of other factors are also taken into account such as the investment's abilities to achieve its initial stated objectives, the level of progress made towards achieving objectives and similar external transactions which may assist in establishing a base for determining fair value.

GREENEARTH ENERGY LTD AND CONTROLLED ENTITIES  
ACN: 120 710 625  
NOTES TO THE FINANCIAL STATEMENTS 30 JUNE 2014

NOTE 3: FINANCIAL RISK MANAGEMENT (continued)

(a) Market price risk (continued)

*Sensitivity*

If security prices were to increase/decrease by 10% from fair values as at the reporting date, assuming all other variables that might impact on fair value remain constant, then the impact on profit for the year and equity is below. This risk is managed by monitoring security prices on a regular basis.

	2014	2013
	\$	\$
<b>+/- 10% price variation</b>		
Impact on profit or loss after tax	1,570	864
Impact on equity	1,570	864

(b) Currency risk

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. At 30 June 2014 the consolidated entity held \$501,274 in foreign bank accounts.

The group undertakes transactions denominated in foreign currencies; consequently, exposures to exchange rate fluctuations arise. Exchange rate exposures are managed to the extent considered appropriate based on the level of activity.

The carrying amounts of the group's foreign currency denominated monetary assets and monetary liabilities at the end of the reporting period are as follows.

	Liabilities		Assets	
	2014	2013	2014	2013
Unites States Dollar (USD)	732,388	20,558	501,274	539

*Sensitivity*

If foreign exchange rates were to increase/decrease by 10% from rates used to determine fair values of all financial instruments as at the reporting date, assuming all other variables that might impact on fair value remain constant, then the impact on profit for the year and equity is as follows. The sensitivity analysis includes only outstanding foreign currency denominated monetary items and adjusts their translation at the year end for a 10% change in foreign exchange rates.

	2014	2013
	\$	\$
<b>10% appreciation of AUD against USD</b>		
Impact on profit or loss after tax	24,534	2,158
Impact on equity	24,534	2,158
<b>10% depreciation of AUD against USD</b>		
Impact on profit or loss after tax	(24,534)	(2,158)
Impact on equity	(24,534)	(2,158)

**NOTE 3: FINANCIAL RISK MANAGEMENT (continued)**

**(c) Interest rate risk**

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate as a result of changes in market interest rates.

The company does not currently have any interest bearing debt. Cash deposits attract interest at the prevailing floating interest rates, which for interest bearing deposits is currently 3.2%.

No other financial assets or financial liabilities are expected to be exposed to interest rate risk.

**(d) Credit risk**

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation.

The maximum exposure to credit risk at balance date to recognised financial assets is the carrying amount, net of any provisions for impairment of those assets, as disclosed in the statement of financial position and notes to the financial statements.

The consolidated entity's only material credit risk exposure to any single receivable or group of receivables under financial instruments entered into by the entity is \$nil (2013: \$600,000) due from Erdi Fuels Pty Ltd and is disclosed in Note 11.

*i) Cash deposits*

Credit risk for cash deposits is managed by holding all cash deposits with major Australian banks.

*ii) Trade receivables*

Credit risk for trade receivables is managed by setting credit limits and completing credit checks for new customers. Outstanding receivables are regularly monitored for payment in accordance with credit terms.

*iii) Other receivables*

Credit risk for other receivables is managed by ensuring the group only trades with parties that are able to trade on the group's credit terms.

**(e) Liquidity risk**

Liquidity risk is the risk that an entity will encounter difficulty in meeting obligations associated with financial liabilities.

The group manages liquidity risk by forecasting and monitoring cash flows on a continuing basis.

GREENEARTH ENERGY LTD AND CONTROLLED ENTITIES  
ACN: 120 710 625  
NOTES TO THE FINANCIAL STATEMENTS 30 JUNE 2014

NOTE 3: FINANCIAL RISK MANAGEMENT (continued)

(e) Liquidity risk (continued)

*Maturity analysis*

For financial instruments held by the Group at balance date, the table below represents the undiscounted contractual settlement terms for financial instruments and management's expectation for settlement of undiscounted maturities.

	< 6 Months	6-12 months	1-5 years	Total contractual cash flows
	\$	\$	\$	\$
Cash and cash equivalents	3,187,415	-	-	3,187,415
Receivables	414,550	-	-	414,550
Other financial assets	69,826	-	-	69,826
Payables	(843,820)	(47,800)	-	(891,620)
Other financial liabilities	(530,786)	-	-	(530,786)
Net maturities	<u>2,297,185</u>	<u>(47,800)</u>	<u>-</u>	<u>2,249,385</u>

For all items shown above, the carrying amounts are equal to the total contractual cash flows, except receivables. Details of adjustments to the carrying amount of receivables are detailed in note 11.

For clarity Directors emphasise that amounts disclosed at Notes 20 & 21 are deferred revenue and not future cash obligations.

(f) Fair values compared to carrying amounts

The net fair value of financial assets and financial liabilities approximate their carrying amounts as disclosed in the consolidated statement of financial position and notes to the consolidated financial statements.

NOTE 4: FAIR VALUE MEASUREMENTS

Assets and liabilities measured and recognised at fair value have been determined by the following fair value measurement hierarchy:

- Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities
- Level 2: Input other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly
- Level 3: Inputs for the asset or liability that are not based on observable market data

All financial assets at fair value through profit or loss totalling \$15,702 (2013: \$8,636) as disclosed in Note 13 are classified as Level 1 items in the fair value hierarchy. There were no transfers between level 1 and level 2 during the year.

**NOTE 9: DISCONTINUED OPERATION**

In 2012, following the completion of a diagnostic review of all aspects of the company, it was concluded that even though there is a growing demand for waste heat recovery technology, due to long project establishment lead-times and low margins, the business unit, Pacific Heat and Power held no strategic value for the company.

The company entered into a sale agreement on 11 July 2012 with a sale price of \$78,405, which was collected to a value of \$54,883. The gain on sale is shown below.

The results of the discontinued operation for the period until disposal are presented below:

		<u><u>353,925</u></u>	<u><u>892,207</u></u>

**(a) Provision for impairment**

*(i) Trade receivables*

Trade receivables are non-interest bearing and usually have 30 day terms. An impairment loss is recognised when there is objective evidence that an individual trade receivable is impaired. The impairment losses have been included within Impairment Expense in the consolidated statement of comprehensive income. All trade receivables that are not impaired are expected to be received within trading terms.

*(ii) Other receivables*

Other receivables includes rebates receivable from the Australian Taxation office and, in 2013, amounts due from Erdi Fuels Pty Ltd, the payment terms of which are identified in Note 21. All other receivables that are not impaired are expected to be received within payment terms.

NOTE 15: EQUITY ACCOUNTED INVESTMENTS (continued)

(a) Summarised financial information for associates

Summarised financial information in respect of each of the Group's material associates is set out below. The summarised financial information below represents amounts shown in the associate's financial statements prepared in accordance with AASBs adjusted by the Group for equity accounting purposes.

(i) *NewCO2Fuels Ltd*

Current assets		911,793	392,448
Non-current assets		5,999,645	3,966,939
Current liabilities		291,675	241,534
Non-current liabilities		6,109,691	3,263,802
Revenue		-	985,028
Net profit/(loss) from continuing operations		(690,586)	114,146
Other comprehensive income		-	-
Total comprehensive income		(690,586)	114,146

Reconciliation of the above summarised financial information to the carrying amount of the interest in NewCO2Fuels Ltd recognised in the consolidated financial statements:

Net assets of the associate		510,072	854,051
Proportion of the Group's ownership interest in NewCO2Fuels Ltd		33.33%	50%
Group's share of net assets		170,007	427,026
Goodwill and other adjustments including unrealised currency translation impacts		987,405	1,504,617
Carrying amount of the Group's interest in NewCO2Fuels Ltd		<u>1,157,412</u>	<u>1,931,642</u>

(ii) *PT Geopower Indonesia*

Net loss from continuing operations		(72,629)	(81,338)
Other comprehensive income		-	-
Total comprehensive income		(72,629)	(81,338)

Notes	2014	2013
	\$	\$

NOTE 15: EQUITY ACCOUNTED INVESTMENTS (continued)

(b) Change in the Group's ownership interest in an associate

*(i) Investment disposed during the year - NewCO2Fuels Ltd*

In the prior year, the Group held a 50% interest in NewCO2Fuels Ltd and accounted for the investment as an associate. In June 2014, the Group disposed of its original 50% interest in NewCO2Fuels Ltd to a third party, having previously issued an option over that investment. Proceeds on disposal totalling \$3.6 million were received progressively over a three year period ending in June 2014. These proceeds included the Purchase Option and Advance on Purchase Option amounts previously shown in the statement of financial position as deferred revenue. This transaction has resulted in the recognition of a gain in profit or loss, calculated as follows:

Proceeds of disposal	3,611,021	-
Less: carrying amount of investment at disposal	<u>(1,449,870)</u>	-
Gain recognised	<u><u>2,161,151</u></u>	<u><u>-</u></u>

*(ii) Investment acquired during the year - NewCO2Fuels Ltd*

In June 2014, the Group entered into an agreement to acquire a 33.33% interest in NewCO2Fuels Ltd (concurrent with the disposal of its previous 50% interest, as described above). The new investment allows the Group to invest up to USD \$3m by January 2015, with a minimum investment of USD \$1m. The Group's 33.33% interest is subject to partial claw-back should less than USD \$3m ultimately be invested by the Group. The maximum possible claw-back would result in the Group retaining an interest of 17.81% instead of 33.33%.

The minimum new investment amount is recognised at balance date as an investment in associate, with the unpaid portion of the minimum investment recognised as a liability (refer note 19). The difference between the total investment amount and the minimum investment amount represents a contingent asset and a contingent liability as follows:

Contingent asset relating to interest in associate	<u>2,123,142</u>	-
Contingent liability relating to interest in associate	<u><u>2,123,142</u></u>	<u><u>-</u></u>

- (i) 27,739,910 shares were issued during the year for 2.5 cents per share pursuant to a share placement.
- (ii) 43,233,330 shares were issued during the year for 7.5 cents per share pursuant to a share placement.
- (ii) 7,805,1650 shares were issued during the year for 7.5 cents per share pursuant to a share purchase plan.
- (iv) 719,222 shares were issued during the prior year for 5 cents per share as a result of exercise of unlisted options.

**NOTE 23: SHARE CAPITAL (continued)**

**(b) Movements in shares on issue (continued)**

- (v) 4,204,286 shares were issued during the prior year for 3.5 cents per share in lieu of Directors' fees and associated superannuation applicable to the financial year ended 30 June 2012. Refer to section D(b) of the Remuneration Report within the Directors' Report.
- (vi) 1,527,410 shares were issued during the prior year for 3.2 cents per share as partial consideration for the acquisition of the remaining equity interest in Greenearth Energy Efficiency Pty Ltd. Refer note 31(b).

**(c) Terms and conditions of share capital**

*Ordinary shares*

Ordinary shares have the right to receive dividends as declared and, in the event of winding up the company, to participate in the proceeds from the sale of all surplus assets in proportion to the number of and amounts paid up on shares held. Ordinary shares entitle their holder to one vote, either in person or by proxy, at a meeting of the company.

**(d) Share options**

Options over ordinary shares:

*(i) Options issued to directors and employees*

The issue of options provides an effective way for the directors to give employees a chance to share in the success of the company and enhance the ability of the company to retain staff of the required calibre, at a lower rate of remuneration that might otherwise be required.

As part of the director annual remuneration review, consideration is given to individual employee's performance, workload and dedication to achieving the company's objectives when deciding whether or not to award options as an incentive.

Details of options issued to directors and employees are provided in note 29(a).

**(e) Capital management**

When managing capital, management's objective is to ensure the entity continues as a going concern as well as ensuring there are sufficient funds to meet exploration commitments, which is performed via monitoring of historical and forecast performance.

<b>Capital expenditure commitments</b>			
<i>Exploration, technology and corporate commitments</i>			
Not later than one year		-	-
Late that one year and not later than five years		-	-
		<u>-</u>	<u>-</u>

The company retains interests in exploration tenements via direct ownership. To continue these interests a work program is maintained in each tenement for periods up to five years. The work programs have minimum expenditure requirements and carry no formal commitments or legal obligations but are an indication of the tasks required to be completed to retain the permit.

At the company's request, the Victorian Government granted suspensions for the the work program requirements associated with the company's geothermal exploration permits (GEP10, GEP12 and GEP13) until May 2015, due to the lack of geothermal funding by Government and current government policy relating to a moratorium on "fracking" (hydraulic stimulation) and well activity.

The company is not committed to this expenditure while its work program is suspended.

**NOTE 27: CONTINGENCIES**

As at balance date, the company had no contingent assets or liabilities other than those relating to its interests in associates (refer note 15).

<b>NOTE 28: LOSS PER SHARE</b>			
<i>(i) Loss per share from continuing operations attributable to equity holders of the parent</i>			
Reconciliation of loss used in calculating loss per share:			
Net loss from continuing activities attributable to equity holders of the parent entity		(226,112)	(1,822,334)
Net loss used in calculating basic and diluted loss per share		<u>(226,112)</u>	<u>(1,822,334)</u>
Weighted average number of ordinary shares used in calculating basic earnings per share		142,108,356	115,158,422
Effect of dilutive securities:			
Share options		-	-
Adjusted weighted average number of ordinary shares used in calculating diluted earnings per share		<u>142,108,356</u>	<u>115,158,422</u>
<i>(ii) Loss per share attributable to equity holders of the parent</i>			
Reconciliation of loss used in calculating loss per share:			
Net loss attributable to equity holders of the parent entity		(226,112)	(1,612,016)
Net loss used in calculating basic and diluted loss per share		<u>(226,112)</u>	<u>(1,612,016)</u>
Weighted average number of ordinary shares used in calculating basic earnings per share		142,108,356	115,158,422
Effect of dilutive securities:			
Share options		-	-
Adjusted weighted average number of ordinary shares used in calculating diluted earnings per share		<u>142,108,356</u>	<u>115,158,422</u>

Due to losses incurred all potential ordinary shares that could potentially dilute basic loss per share in the future were considered to be anti-dilutive and therefore not included in the calculations of diluted loss per share. Accordingly basic and diluted loss per share equate.

GREENEARTH ENERGY LTD AND CONTROLLED ENTITIES  
ACN: 120 710 625  
NOTES TO THE FINANCIAL STATEMENTS 30 JUNE 2014

NOTE 29: SHARE BASED PAYMENTS

(a) Employee option plan

The Group has an ownership-based compensation scheme for executives and senior employees, for the purposes of recognising the ability and efforts of employees (including officers) who have contributed to its success, provide an incentive for employees to achieve the long term objectives of the Group and improve its performance, and attract and retain persons of experience and ability. In accordance with the terms of the plan, as approved by shareholders at a previous annual general meeting, employees may be granted options to purchase ordinary shares.

Each employee share option converts into one ordinary share of Greenerth Energy Ltd on exercise. No amounts are paid or payable by the recipient on receipt of the option. The options carry neither rights to dividends nor voting rights. Options may be exercised at any time from the date of vesting to the date of their expiry.

Details of the options granted are provided below:

2014

**NOTE 33: SEGMENT INFORMATION**

**(a) Description of segments**

The group has five reportable segments. The Group holds, or is interested in geothermal acreage or projects which operate in different geographical settings. These settings can be clearly identified by the country they are situated in, or if they exist within Australia, the geological basin they are contained in. A brief description of each identified segment is detailed below. Corporate head office and administration costs are not allocated to segments.

*Segment 1: Geothermal - Otway Basin*

The Otway Basin extends along the Southern Margin across Victoria and South Australia. The Basin covers an area of approximately 150,000km<sup>2</sup> of which 35% is onshore. Greenerth Energy's GEP10 is contained within the Otway Basin.

*Segment 2: Geothermal - Gippsland Basin*

The Gippsland Basin covers approximately 56,000 km<sup>2</sup> of South Eastern Victoria, of which approximately 16,000km<sup>2</sup> lies onshore. Greenerth Energy's GEP 12 and 13 permits are located within the Basin.

*Segment 3: Geothermal - Indonesia*

Greenerth Energy Group is exploring the possibility of geothermal development projects within the country of Indonesia. Indonesia is a widely recognised geothermal province.

*Segment 4: Energy Efficiency*

Greenerth Energy Group via its subsidiary, Greenerth Energy Efficiency Pty Ltd maintains a distribution agreement with Metrolight Ltd, to introduce its energy efficient lighting solution to the Australian and Pacific Rim. During the financial period, revenue has been received by this segment.

*Segment 6: Other Projects*

This segment includes other non-geothermal investments or projects, which Greenerth Energy Ltd has either invested in but have not been fully expanded into a distinct business segment, or technologies or project that are currently being considered. This segment includes the consolidated entity's investment in NewCO2Fuels Ltd.

DIRECTORS' DECLARATION

The directors declare that the financial statements and notes set out on pages 25 to 75 in accordance with the *Corporations Act 2001* :

- (a) Comply with Accounting Standards and the Corporations Regulations 2001, and other mandatory professional reporting requirements;
- (b) As stated in Note 1(a) the consolidated financial statements also comply with International Financial Reporting Standards; and
- (c) Give a true and fair view of the financial position of the consolidated entity as at 30 June 2014 and of its performance for the year ended on that date.

In the directors' opinion there are reasonable grounds to believe that Greenearth Energy Ltd will be able to pay its debts as and when they become due and payable.

This declaration has been made after receiving the declarations required to be made by the chief executive officer and chief financial officer to the directors in accordance with Section 295A of the *Corporations Act 2001* for the financial year ending 30 June 2014.

This declaration is made in accordance with a resolution of the directors.

---

Samuel R Marks

Managing Director

Greenearth Energy Ltd

Dated this 29th day of September 2014

Melbourne

**GREENEARTH ENERGY LTD  
ABN 60 120 710 625  
AND CONTROLLED ENTITIES**

**INDEPENDENT AUDITOR'S REPORT  
TO THE MEMBERS OF  
GREENEARTH ENERGY LTD**

**Report on the Financial Report**

We have audited the accompanying financial report of Greenearth Energy Ltd and controlled entities, which comprises the consolidated statement of financial position as at 30 June 2014, the consolidated statement of comprehensive income, the consolidated statement of changes in equity and the consolidated statement of cash flows for the year then ended, notes comprising a summary of significant accounting policies and other explanatory information, and the directors' declaration of the consolidated entity comprising the company and the entities it controlled at the year's end or from time to time during the financial year.

*Directors' Responsibility for the Financial Report*

The directors of the company are responsible for the preparation of the financial report that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001* and for such internal control as the directors determine is necessary to enable the preparation of the financial report that gives a true and fair view and is free from material misstatement, whether due to fraud or error. In Note 1, the directors also state, in accordance with Accounting Standard AASB 101 *Presentation of Financial Statements*, that the financial statements comply with *International Financial Reporting Standards*.

*Auditor's Responsibility*

Our responsibility is to express an opinion on the financial report based on our audit. We conducted our audit in accordance with Australian Auditing Standards. Those standards require that we comply with relevant ethical requirements relating to audit engagements and plan and perform the audit to obtain reasonable assurance about whether the financial report is free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial report. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial report, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the company's preparation of the financial report that gives a true and fair view in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the financial report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

*Independence*

In conducting our audit, we have complied with the independence requirements of the *Corporations Act 2001*.

**GREENEARTH ENERGY LTD  
ABN 60 120 710 625  
AND CONTROLLED ENTITIES**

**INDEPENDENT AUDITOR'S REPORT  
TO THE MEMBERS OF  
GREENEARTH ENERGY LTD**

*Opinion*

In our opinion:

- (a) the financial report of Greenearth Energy Ltd is in accordance with the *Corporations Act 2001*, including:
  - (i) giving a true and fair view of the consolidated entity's financial position as at 30 June 2014 and of its performance for the year ended on that date; and
  - (ii) complying with Australian Accounting Standards and the *Corporations Regulations 2001*; and
- (b) the consolidated financial report also complies with *International Financial Reporting Standards* as disclosed in Note 1.

*Emphasis of Matter*

The Directors have prepared the financial report on a going concern basis, which contemplates continuity of normal business activities and the realisation of assets and the settlement of liabilities in the ordinary course of business.

The consolidated entity incurred a net loss for the year of \$226,112 (2013: \$1,612,998) and at the reporting date total assets exceeded total liabilities by \$5,971,095 (30 June 2013: \$1,512,559), including exploration and evaluation assets of \$2,146,783 (30 June 2013: \$2,134,401).

The Directors have determined that there may be a net cash requirement of \$1,001,000 over the forthcoming 12 months to maintain operations, after allowing for existing cash reserves and contracted upcoming cash receipts. The Directors anticipate that this potential net cash requirement of \$1,001,000 is to be funded by a combination of the net operating cash flow of Greenearth Energy Efficiency Pty Ltd ("GEE", a company within the consolidated group), raising additional capital, and other funding avenues such as continued development of other renewable technologies and expanding revenue streams.

The anticipated revenue growth (and consequent cash flow contribution) of GEE over the next 12 months is based on certain assumptions in relation to the short-term development of the business. These assumptions relate to the expected future revenue and profitability of GEE during that time and are based on currently available information including management assessments of probable future orders and other information.

The financial report does not include any adjustment relating to the recoverability or classification of recorded asset amounts nor to the amounts or classification of liabilities that might be necessary should the consolidated entity be unable to trade as forecast or to raise sufficient funding to continue as a going concern.

GREENEARTH ENERGY LTD  
ABN 60 120 710 625  
AND CONTROLLED ENTITIES

INDEPENDENT AUDITOR'S REPORT  
TO THE MEMBERS OF  
GREENEARTH ENERGY LTD

If the going concern basis of accounting is found to no longer be appropriate, the recoverable amount of the assets shown in the Consolidated Statement of Financial Position are likely to be significantly less than the amounts disclosed and the extent of liabilities may differ significantly from those reflected.

These conditions, as set forth in Note 1 (b), indicate the existence of a material uncertainty that may cast significant doubt about the company's ability to continue as a going concern and therefore, the company may be unable to realise its assets and discharge its liabilities in the normal course of business.

**Report on the Remuneration Report**

We have audited the Remuneration Report included in pages 13 to 23 of the directors' report for the year ended 30 June 2014. The directors of the company are responsible for the preparation and presentation of the Remuneration Report in accordance with section 300A of the *Corporations Act 2001*. Our responsibility is to express an opinion on the Remuneration Report, based on our audit conducted in accordance with Australian Auditing Standards.

*Opinion*

In our opinion, the Remuneration Report of Greenearth Energy Ltd and controlled entities for the year ended 30 June 2014 complies with section 300A of the *Corporations Act 2001*.
