About NewCO2Fuels

In June 2014, Greenearth Energy Ltd (Greenearth) finalised the details of its investment in NewCo2Fuels Israel (NCF) to 33.33 percent. Under this agreement, Greenearth has commenced payments to NCF, with the remainder of the USD\$3m investment now due by 1 March 2016. The investment is subject to partial claw-back by NCF should less than USD\$3m be ultimately invested by Greenearth. The maximum possible claw-back would result in the Group retaining an interest of 25.21% instead of 33.33%.

NewCO2Fuels (NCF) is an Israeli start-up company which was formed in 2011 by a group of scientists and entrepreneurs with the support of Greenearth Energy Ltd and the Erdi Group. NCF was formed to develop and commercialise an innovative system to profitably produce fuels from CO₂ and water, using renewable high temperature heat from solar or excess heat from industry. The system is based on a technology previously developed at the Weizmann Institute of Science and exclusively licensed to NCF.
